

STEALTH AIR CORP.

Investor & shareholder overview

Pioneering Technology Enabled
Services Businesses

September 2026

Business overview

Technology applied to established industries

Stealth Air develops technology enabled services businesses. Land surveying is the first deployment of its operating approach.

Current focus

Aero Land Surveyors

Supporting R&D
Stealth Air Innovation, Inc.

Company development

2016

Founded as a drone company

Stealth Air developed a commercial application for drones in land surveying, then incorporated complementary geospatial technology and in-house workflow applications.

AI + Pioneering Technology

Drone, LIDAR, GNSS/GPS

Field collection

Aerial capture, spatial measurements
and high-accuracy positioning.

Office production

AI integration, network infrastructure,
workflow applications and drafting.

Land surveying application

Aero Land Surveyors

Stealth Air combines novel technology with established data collection and data transfer methods to support the deployment of land surveying locations.

Digital twins/3D models and drafting support connect collected data with project deliverables.

Wholly owned subsidiaries

Stealth Air Innovation, Inc.

R&D entity responsible for innovative ideas that benefit Stealth Air Corp. and its subsidiaries.

Aero Land Surveyors Florida Southwest, Inc.

Licensed land surveying company serving Southwest Florida.

Aero Land Surveyors Florida Southeast, Inc.

Licensed land surveying company serving Southeast Florida.

Florida service territories

Southwest

**Tampa, FL
to Naples, FL**

Florida's west coast

Southeast

**Melbourne, FL
to Miami, FL**

Florida's southeast corridor

Strategic direction

Expand the Aero brand

Pursue additional land surveying locations.

Continue technology development

Support operating companies through R&D and proprietary workflow applications.

Explore other industries where Stealth Air's technology and operating experience can apply.

Presentation scope & outlook

Business and strategy overview

This presentation describes the business and management's strategic direction. It does not include financial results, valuation, a financing proposal or a securities listing timetable.

Expansion and technology development are intentions. Their timing and results depend on execution, resources and market conditions.

An aerial night view of a coastal town with a drone flying overhead. The town is illuminated by warm lights, and the water reflects the sky. A drone is visible in the upper right corner, flying over the town. The background shows a sunset or sunrise sky with orange and blue hues.
